

WLT COUNTING SCALES

WLT/L counting scale is a separate stand for counting pieces. There is no possibility of extending this set.

Dual range WLT scales are equipped with:

- programmable data base (10.000 records), containing names of articles and their reference masses;
- possibility of switching between the weighing platforms
- ACP function (automatic correction of precision)
- output for PS/2 keyboard (ease at inserting the texts to the scale and programming the data base)
- standard printouts;
- freely programmable printouts (possibility of generating user defined printouts complying with user's quality system requirements)
- possibility of direct printing of report on slip printer using RS 232 and simple text mode;
- possibility of saving and storing reports in memory
- statistic module which can operate in background during counting pieces mode.
- three different procedures of counting pieces:
 - counting by inscribing a reference mass of a single piece;
 - counting by determining a reference mass of single unit during weighing;
 - counting by choosing an item with its mass from data base
